

Pesticide Free Zone Pledge

To the best of my ability I pledge to keep my home and yard free of pesticides (this includes fungicides, herbicides, insecticides and other petrochemical agents that can cause cancer, reproductive harm, genetic damage, endocrine disruption, breathing difficulties and pose high toxicity to fish, birds and pets). Whenever pest control is needed, I will consult with my local organic nursery or contact a knowledgeable agent such as the organizations noted by Alaska Community Action on Toxics (ACAT). I will further attempt, when asked, to educate others regarding my reasons for using organic, pesticide-free control methods.
